TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript, Redux, TailwindCSS, HTML5, CSS3, Vite
- **Backend:** PHP, Laravel, Node.js, Express, Ruby on Rails, Python
- **Databases:** PostgreSQL, MySQL, MongoDB, SQLite
- **CMS & E-commerce:** WordPress, Elementor, WooCommerce, Moodle
- **Integrations & Auth:** Stripe, Fiuu, Billplz, Auth0
- **DevOps & Hosting:** Docker, Git, Vultr, GoDaddy, Hostinger

PROFESSIONAL EXPERIENCE

EDUK8U Grad School Asia | Malaysia (Remote)

Full-Stack Developer - Part-Time/Consultant

Jan 2026 - present

- Rebuilding the WordPress website for a Malaysia-based graduate education platform offering postgraduate programmes, micro-credentials, and professional certifications across Southeast Asia.
- Integrating Moodle LMS with the WordPress ecosystem, enabling course enrollment, student progress tracking, and content delivery for 10+ academic programmes.
- Implementing payment gateway integration for course registration and tuition processing, with secure checkout flows and transaction confirmation handling.
- Collaborating on Prodigy WMS, a workforce management system built on Zoho Creator and Workerly with candidate portals, timesheet approvals, onboarding/offboarding workflows, and automated WhatsApp/email notifications.
- Managing hosting infrastructure across Vultr, GoDaddy, and Hostinger, handling server configuration, DNS management, domain routing, and ongoing performance optimization to ensure platform stability.

Verity Intelligence | Petaling Jaya, Malaysia (Remote)

Full-Stack Developer

March 2024 - present

- Led end-to-end development of 3 WordPress platforms serving 500+ corporate clients across Malaysia and Singapore, integrating Fiuu, Billplz, and Stripe payment gateways processing 200+ monthly transactions.
- Built React frontend features including Auth0 authentication with role-based access control across 8 user types, multi-step Formik forms handling 15+ dynamic fields, and Redux state management across verification and payment workflows.
- Architected 20+ reusable UI components following atomic design principles, delivering responsive interfaces that improved mobile engagement and reduced cross-device layout issues.
- Optimized performance achieving 90+ Lighthouse scores through code splitting, lazy loading, and LiteSpeed caching. Managed production deployments including database migrations and SSL configurations across 3 hosting environments.

Upwork | Manila, Philippines (Remote)

Full-Stack Web Developer

Aug 2022 - Nov 2023

- Delivered 5+ client projects across React, Laravel, and WordPress, including a UK sales management platform (Capital Office), a SaaS accounting tool (Fetch Workpapers), and a US e-commerce store (Elder Armor).
- Implemented Stripe subscription billing with webhook-driven payment recovery and automated invoice generation, processing recurring transactions for 50+ accounts.
- Built custom Laravel Artisan commands for data migrations, report generation, and system maintenance, reducing manual developer workload by ~40%.

PROJECT WORK

Verity Intelligence | WordPress, Elementor, WooCommerce, Fiuu, Billplz | [Live](#)

Background verification platform serving 500+ organizations across Malaysia and Singapore.

- Integrated 2 payment gateways (Fiuu, Billplz) with custom callback URLs and webhook handling, resolving gateway conflicts across sandbox-to-production transitions and processing 200+ monthly transactions.
- Built 15+ Elementor Pro page templates with custom post types for services, case studies, and company updates, empowering 3+ non-technical staff to manage content independently.
- Achieved 90+ Lighthouse performance scores through LiteSpeed caching, image optimization, and code minification, improving average page load time from ~5s to under 2s.
- Hardened site security with SSL management, plugin audits, and regular vulnerability patching, maintaining 99.9% uptime across production.

VERISafe App | React, Redux, Auth0, Stripe, Billplz, Formik | [Live](#)

Secure client portal for organizations to request, track, and manage background verification services across Malaysia and Singapore.

- Implemented Auth0 authentication with role-based access control across 8 user types, securing 1,000+ active sessions with token refresh and logout handling.
- Built multi-step verification request forms for background checks, Risk Check assessments, and KYC compliance, handling 15+ dynamic fields with Formik validation and document uploads.
- Integrated Stripe and Billplz payment gateways with retry logic for failed transactions, processing 200+ monthly payments with automated invoice generation and confirmation emails.
- Managed centralized Redux state across verification requests, user sessions, and payment flows, implementing data caching that reduced redundant API calls by ~30%.

HaloCheck | WordPress, Elementor | [Live](#)

Client-facing background verification platform for organizations to request and monitor screening services.

- Built responsive WordPress layouts with Elementor Pro for candidate screening workflows, optimized across desktop, tablet, and mobile breakpoints.
- Created content management workflows enabling non-technical staff to independently update verification processes, user guides, and platform documentation.

Eduk8u | WordPress, Elementor Pro, PHP, GoHighLevel | [Live](#)

Education platform offering learning programs and course information for students across Asia.

- Maintain and update Elementor Pro page templates for programs, faculty, and announcements, supporting non-technical staff with content publishing workflows.
- Administer GoHighLevel (GHL) for marketing automation, lead capture, and CRM integration across student acquisition funnels.
- Manage backend infrastructure including hosting, domain configuration, DNS, and deployment workflows.

ICQA / Work Ready Asia / AttendCare | WordPress, Elementor Pro, LMS, PHP | [ICQA](#) · [WRA](#) · [AttendCare](#)

Multi-site WordPress portfolio spanning education (ICQA LMS), ethical recruitment (Work Ready Asia), and NDIS home care (AttendCare) across Australia and Southeast Asia.

- Maintain LMS course delivery, enrollments, and student progress tracking for ICQA's Queensland-based education platform.
- Develop and maintain Elementor Pro layouts for industry-specific pages across recruitment, aged care, and NDIS service domains.
- Manage hosting infrastructure, plugin updates, SSL, security hardening, and deployment workflows across all three production environments.

TVET School Asia | Moodle, PHP, MySQL | [Live](#)

Moodle-based LMS delivering technical and vocational education courses across Asia, with a WooCommerce storefront in development.

- Administer Moodle deployment supporting course delivery, enrollments, and learner management for vocational training programs.
- Handle plugin updates, theme customization, and ongoing security maintenance across the LMS stack.
- Designing upcoming WooCommerce storefront (shop.tvetschoolasia.com) for TVET course materials, integrated with the existing Moodle ecosystem.

Capital Office UK | React, Laravel, ArchitectUI | [Live](#)

Sales tracking and client management dashboard for a UK-based office services company.

- Refactored React components with memoization, lazy loading, and code splitting, reducing bundle size by ~40% and improving initial page load by 2+ seconds.
- Built a shared component library of 15+ reusable UI elements (tables, forms, modals, charts) that accelerated feature development and enforced visual consistency across 3 modules (sales, reporting, client management).

Fetch Workpapers | Laravel, PHP, Stripe, PostgreSQL |

SaaS platform for accountants to automate workpaper management, billing, and client communication.

- Implemented Stripe subscription billing with webhook-driven payment confirmations and failed payment recovery, processing recurring transactions for 50+ accounts with automated invoice generation.
- Built custom Artisan commands for data migrations, report generation, and system maintenance, reducing manual developer workload by ~40% and streamlining deployment cycles.
- Developed event-driven email notification system handling 5+ trigger types (payments, document uploads, workflow milestones) with dynamic templates for personalized client communications.

Elder Armor USA | WordPress, WooCommerce | [Live](#)

US-based e-commerce store for protective undergarment products with direct-to-consumer sales.

- Built complete WooCommerce store with product variations, inventory tracking, shipping/tax configuration, and secure checkout, serving 100+ SKUs for US-based customers.
- Customized WordPress theme and WooCommerce templates for brand alignment, delivering mobile-responsive design that improved conversion flow.

EDUCATION

Full Stack Web Development, Avion School

2023

- Intensive coding bootcamp covering Ruby on Rails, React, PostgreSQL, and agile development practices

B.S. in Entrepreneurship, De La Salle University Dasmariñas

2019
